

GEMÜTLICH

This game is meant to be played alongside AI (Computer Vision Explorer or other).

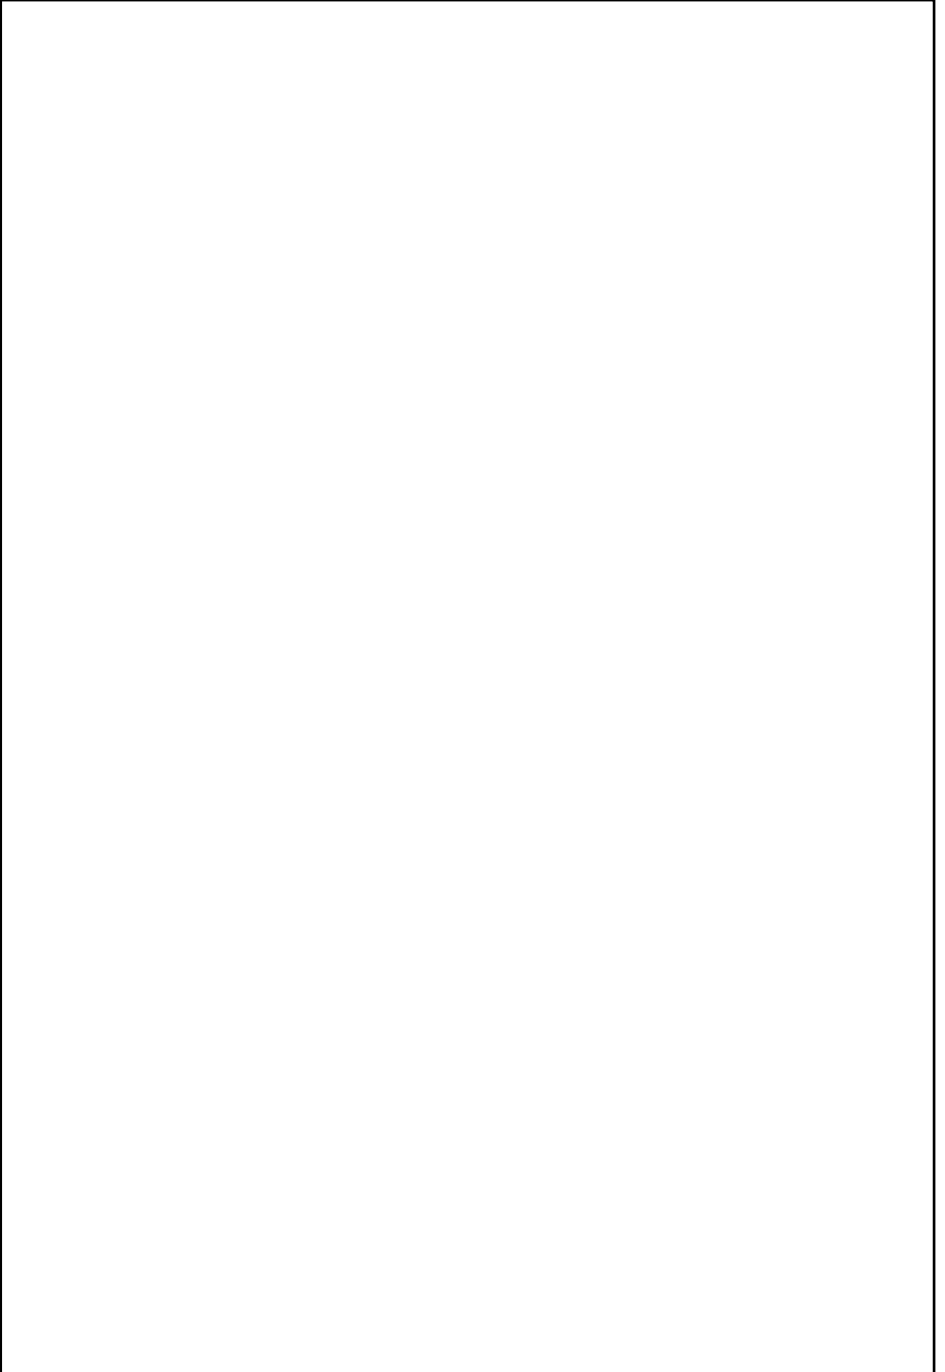

What are the boundaries we form with AI, and when do we allow AI into spaces of vulnerability? This game is an attempt to minimize the daunting nature of AI, or at the very least, bring AI into a place of comfort and familiarity that allows us to understand the way it interacts and responds.

Based off of game of Telestrations - a combination of
pictionary and telephone
